

Clarion

Projection perfection.

Improve your image—with a CLARION projection screen. How? The viewing surface is *perfectly flat*. And a perfectly flat viewing surface means *perfect picture quality*. We've redesigned the CLARION to simplify installation. The CLARION's self-concealing aluminum frame now forms an attractive 2" border, for a clean, theatre-like appearance. The 2" wide beveled, extruded aluminum frame interconnects on site with one simple hand tool that DRAPER provides. Permanent wall mounting brackets included.

System Options

- **Viewing Surfaces**—M1300, M2500, HiDEF GREY, glass beaded, AT1200 or AT GREY.
- **Custom Sizes**—Any size up to the maximum standard size in the CLARION chart. Overall size, including frame, equals image area plus 4".
- **Frame Finishes**—Black aluminum is standard. Cover the frame with optional velvety black, VEL-TEX to eliminate reflections.

Center for Advanced Vehicular Systems (CAVS), Canton (MS) Extension, Mississippi State University. Dealer: Integrated Systems Group—Southern Region, Atlantic Video Corporation, Mobile, AL. Photographer: Jim Bramblett Productions, Mobile, AL. U.S. Patent No. 6,785,047. Other patents pending.

Dimensions & Data—Clarion

	Image Area H x W	Overall Size H x W	Net Wt. (lbs.)	M1300	M2500	HiDef Grey	AT1200/AT Grey	Glass Beaded

Acoustically transparent materials provide an enhanced theatrical experience. However, they are not recommended for screens smaller than 80" wide when used with DLP and LCD projectors. Smaller sizes for use with CRT projectors are available.

Dimensions/Method of Installation
